

# Microsoft Visual Studio

-Managed by ZNetLive

Get productive like never before - do the job with any app and any platform.

Visual Studio (VS) provides a rich, integrated development environment (IDE) for creating applications for Windows, Android, and iOS, as well as modern web applications and cloud services.

It also provides a comprehensive, highly flexible set of application lifecycle management (ALM) tools. VS subscriptions offer benefits such as development/test use rights for Microsoft platform software like SQL Server/Windows/Windows Server, monthly Microsoft Azure credits, a developer account for publishing apps to the Windows Store and an Office 365 Developer subscription.

## How managed\* Visual Studio service helps?

With our managed Visual Studio suite of development technologies and tools, we help you build multiplatform applications and enable DevOps capabilities for use by your team. Moreover, we take care of all subscription related hassles and our support services ensure that you have the guidance and help, as and when needed.

### Visual Studio IDE

Quickly develop apps for Android, Mac, iOS, Windows, web and cloud.

- Write code faster
- Diagnose and debug easily
- Test repeatedly and release confidently
- Extend and customize per your wish
- Collaborate effectively

### Visual Studio App Center

Continuously build, test, deploy, engage, learn and repeat.

- Do testing on real devices
- Build in the cloud
- Deploy as per your need
- Analyze and faster learn
- Monitor app health and engage more with push notifications

### Team Services (VSTS)

Plan in a better way, be agile, code together and reach market faster.

- Social coding capability with Git
- Agile planning
- Continued integration and delivery
- Utilize any IDE or editor and language per your choice

### Team Foundation Server (TFS)

Share code & track work with software development tools of TFS for professional teams that integrates with any editor/ IDE.

- Includes code repositories, continuous integration, bug & task tracking & tools for agile planning
- Use any language, any tool – works well with any Git client

## Features of Visual Studio

- **Develop & Build:** Write & manage your code with code editor; compile and build your own source code.
- **Debug & Test:** Investigate and fix all code problems; organize your testing process.
- **Deploy:** Share your apps with InstallShield, Web Deploy, Continuous Integration and more.
- **Version Control:** Use version control technologies, TFVC & Git to share code.
- **DevOps:** Build continuously and release your apps in the cloud and use VSTS to implement Agile practices.
- **Extend:** Add own functionalities to VS IDE for better development experience.

### Visual Studio Code

Better edit and redefine coding with Visual Studio powerful editor

- Edit and debug apps on any operating system
- Get in built support for Git
- Over 4000 extensions
- Free and opensource service

### Subscriber Benefits<sup>#</sup>

- Cloud services – Azure credits, Dev/test pricing, Office 365 Developer subscription, Power BI Pro, W and more
- Software for dev/test, including Office Professional Plus, Project, Visio, Windows, Windows Server, SQL server and more
- Software for production use, training & support services

ZNetLive provides two managed Visual Studio plans - **Professional 2017** for small development teams and **Enterprise 2017** to meet the development quality and scale requirements of teams of all sizes, without the subscription maintenance hassles.
