Modern tools for a collaborative classroom

OFFICE 365 FOR EDUCATION

- **Office 365 for Education** is free for schools, teachers, and students. Only Office 365 provides both online and desktop apps.
- Access documents on **OneDrive** from anywhere on any device or browser, and co-author with fellow students using **Office 2016**, **Office Online** and **Office Mobile** apps.
- Office enables new ways to learn with **intelligent features** like Editor to help students become better writers, presenters and data analysts. Additionally, students learn using the only software listed as a top employer demand for high-paying jobs.
- **Microsoft Teams** is a hub for collaboration in Office 365. Teachers will be able to manage their entire classroom workflow in Teams – share files, make announcements, and give assignments.
- **OneNote Class Notebooks** improve the quality of collaboration and interactivity by organizing a digital binder for each class. Teachers can organize course content, give feedback to individual students, and deliver interactive lessons. It also integrates directly with school's / institution's Learning Management System.
